

Enrichment

Use with Chapter 10, Lesson 2.

Scrambled Words

Unscramble the words in the box to identify each of the following descriptions of parts of the circulatory system. Write the correct word or words in the space provided.

steeriar
splaam

lettepla
crevilent

der scel
thewi escll

- _____ 1. Liquid part of the blood that carries solids and nutrients
- _____ 2. Lower chamber of the heart that pumps blood to the lungs or to other parts of the body
- _____ 3. Solid part of the blood that carries oxygen
- _____ 4. Solid part of the blood that fights disease
- _____ 5. Blood vessels that take blood away from the heart
- _____ 6. Solid part of the blood that helps it clot

Thinking About Health

Read the following statements carefully. On the line provided, write a sentence that explains what is wrong with each statement.

7. Luisa's blood pressure is 110 over 70. The doctor prescribed medication for high blood pressure.

8. Kim has hemophilia. Hemophilia is a type of cancer that affects blood cells.

9. Jake has type A positive blood. If he ever needs a transfusion, he can receive blood from any donor.

10. Nancy had a heart attack. This must have been caused by her lack of exercise.
